

# Buildings for Tomorrow

OCTOBER 28-31, 2014

METRO TORONTO  
CONVENTION CENTRE

## REGISTRATION FORM

Name: \_\_\_\_\_

Company: \_\_\_\_\_

Mailing Address: \_\_\_\_\_

City: \_\_\_\_\_

Province: \_\_\_\_\_ Postal Code: \_\_\_\_\_

Phone: \_\_\_\_\_

Email: \_\_\_\_\_

## INTERESTED IN SUPPORTING THE CONFERENCE?

Please send me further information on becoming a sponsor/exhibitor.

I am interested in:

- Premier \$35,000 +
- Diamond \$20,000
- Platinum \$10,000
- I would like to participate on the conference planning committee

Please return this form to:

The Organizing Committee  
14th Canadian Conference on Building  
Science and Technology  
2800 - 14th Avenue, Suite 210  
Markham, ON L3R 0E4

## Message from the Conference Chair

The Ontario Building Envelope Council is proud to host the 14th Canadian Conference on Building Science and Technology. For almost 30 years, the CCBST series has been a not-to-be-missed event held in major centers across

Canada. In 2014, it is Toronto's turn and OBEC will be building on the amazing success of CCBST 13 in Winnipeg this year, CCBST 12 in Montreal, CCBST 11 in Vancouver as well as previous. CCBST 14 promises to have over 100 peer reviewed papers submitted from experts in design, construction, research, and rehabilitation on topics including building innovation, energy efficiency, cost-effectiveness, and building envelope performance. As an added benefit to all participants, there is also a trade show with space for 80 to 100 booths for suppliers of building envelope products, systems, and designs, and associated stakeholders.

2014 is not that far away and our organizing committee is coming together now to prepare for this event. If you are interested in participating as a member of the committee, as a sponsor, or as a volunteer on the floor during the conference, OBEC would love to hear from you.

Gerald R. Genge, P.Eng., C.Eng., BDS, BSSO, C.Arb., Q.Med.  
Conference Chair

# Buildings for Tomorrow

OCTOBER 28-31, 2014

METRO TORONTO  
CONVENTION CENTRE

## THEMES

The 14th conference will focus on four major themes:

- Innovation
- Energy Efficiency
- Cost-Effectiveness
- Performance

## STREAMS

Since the building industry is largely structured around more basic parameters, the Buildings for Tomorrow Conference will present the papers aligned along three paths:

- Design
- Materials
- Construction

## TARGETS

### LOCAL MARKET

The Greater Toronto Area (GTA) alone has a population of approximately 6 million, all within an hour of the core of Toronto. Moreover, the GTA has a concentration of building science consultants, academic institutions, trades, materials suppliers, and persons with aligned interests in building ownership and management. These all represent a substantial source for papers and delegates.

It is expected that in the order of 60% of the papers will come from this local area.

### CANADIAN MARKET

The CCBST conference has typically attracted delegates from across Canada, due to the practice of moving the conference to the host cities of the various BECs. As such, the conference benefits from a “Canadian” persona rather than a singular local identity.

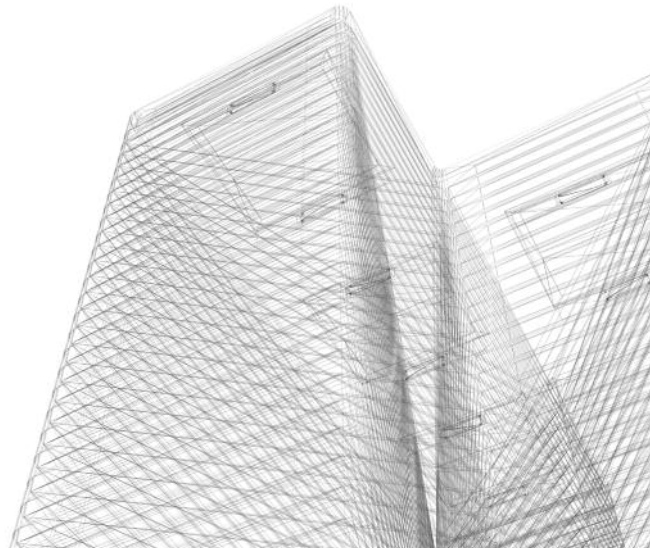

As such it is expected that papers will continue to be submitted from major centers across Canada and will represent on the order of 25% of the papers and delegates.

### INTERNATIONAL MARKET

CCBST has had a relative few papers from the United States and overseas. In 2014, it is hoped that the expanded scope and the attraction of Toronto as a centre itself, will increase the number of international papers and delegates.

OBEC, with the cooperation of supporting BECs across Canada, has targeted 15% of the papers to come from international sources. It is also anticipated that 60% to 70% of those papers (10% total) will be from the United States; however, the topic may well be of international interest.

The target number of delegates is set at 400.

# Buildings for Tomorrow

Canadian Conference on Building Science and Technology provides a forum for the presentation, discussion and sharing of practical building science research, knowledge and field experience. Traditionally, the conference has brought together architects, engineers, building scientists and researchers to discuss building science principles and issues governing the design, construction, repair, renovation and operation of all building types.

The 14th Canadian Conference on Building Science and Technology will be hosted by the Ontario Building Envelope Council. Watch the website for program updates [www.obec.on.ca](http://www.obec.on.ca)
