

The State of the Market for Dynamic Glass

Event qualifies for 1 BSS Credit | 1 OAA Core Learning Hours

As buildings increasingly focus on designs and technologies that support both occupant wellness and sustainability, there is growing recognition of the need for more advanced, active façade solutions. As a result, dynamic glass has seen a significant uptick in adoption in recent years both in Canada and around the world.

In this webinar, Jordan Doria, Eastern Canada Territory Manager for the SageGlass business of Saint-Gobain, will provide a detailed update on the state of the market for dynamic glass. This will include a summary of what is happening in the market, details on the technology and how it has advanced, data on how it helps meet Toronto Green Standard and Passive House requirements and relevant case studies.

SPEAKER: Jordan Doria

Jordan Doria is the Eastern Canada Territory Manager for Saint-Gobain's SageGlass business. He has held different roles within SageGlass' Marketing and Sales organizations in his three years with the company. Jordan has over twelve years of experience in the buildings products and construction

industry, ranging from buildings controls and HVAC to the building envelope and glazing. He has always focused on technologies that deliver energy savings and sustainability benefits for people and the planet.
